RÖNt III: The Next Generation

25 years after the original RÖNt debuted, Brinkmann Audio is proud to introduce RÖNt III, the third generation of their legendary Tubed Power Supply for use with ALL Brinkmann turntables.

Utilising Brinkmann's new and proprietary BZ34 "Rectifier Tube Simulator" to combine higher performance with lifetime reliability, RÖNt III incorporates additional circuit upgrades including a redesigned high-voltage path as well as improved transformers, all of which offer a more detailed, dynamic and musical presentation.

Given the scarcity of high quality, reliable GZ34/5AR4 Rectifier Tubes, Helmut has developed an entirely new technology—dubbed "BZ34" in honour of the GZ34/5AR4 tube used in RÖNt II—which maximises both sound quality and longevity. The BZ34 will eventually be available to RÖNt II owners, adhering to Brinkmann's anti-obsolescence philosophy.

Anniversary Book Now Available

Previously available exclusively to the 33 customers who purchase Brinkmann's "33-1/3 Anniversary" Balance, the Brinkmann Anniversary "Coffee Table Book" will now be offered to Dealers and Distributors.

Richly illustrated, including rare historical photos, the Anniversary Book is intended for use as a marketing tool and will not be offered to end users. Please contact Symmetry for pricing and availability.

More Press Praise for Taurus

As we await the upcoming review in the February issue of The Absolute Sound, we're proud to share this glowing review from the German magazine HiFi and Records.
